WELCOME TO OUR MONTHLY ROUND-UP

During the month of June, we continued our work around the world. In Palestine, we continued to renovate and build homes for families affected by the conflict, as well as reviewing the desalination plant we have built at the Right to Live Society. In Turkey and Pakistan, we continued to support education for adults and young people. In East Africa, we are working in Sudan, Somalia and Kenya in order to combat food insecurity and drought. And as Bangladesh experienced incredible flooding and Afghanistan was struck by a terrible earthquake, we immediately responded by providing those affected with emergency aid.

Read on to learn more about our field work in each country over the past month.

BANGLADESH

EMERGENCY

After sudden floods in June that affected around **four million people** in Bangladesh, the Human Appeal team got into action to provide vital emergency aid. We provided food parcels, water purification tablets, hygiene kits and blankets for **444 vulnerable families** affected by the deadly floods in the Sylhet district of Bangladesh.

A woman carries emergency aid from Human Appeal back to her family.

PALESTINE

QURBANI

Our teams visited local farms to ensure all animals are in the best condition for Qurbani. We plan to distribute Qurbani meat to **4,800 people** in the Gaza Strip, with each family receiving **2.5kg** of fresh meat.

A vet checks the health of animals for Qurbani in Palestine.

SHELTER

In June, we finished renovating around **80 homes** that were deteriorated or damaged in the recent escalation, helping an estimated **480 people** with a roof over their heads.

Workmen renovating one of the houses damaged in last May's escalation.

Finalising the secure payment to those affected.

SHELTER

We finalised payments to **23 families** whose homes were damaged in the escalation, so they could afford vital repairs to their houses.

WATER

After building a water desalination plant for the Right to Live Society, servicing around **1,189 people** with autism and Down Syndrome, we visited the Right to Live society, and met children there making decorations for Eid celebrations in June.

Children at the Right to Live Society making decorations for Eid.

TURKEY

Chatter between students and teachers in the ICT classroom.

EDUCATION

We worked alongside the Turkish Red Crescent to build an ICT classroom for Syrian refugee students, and invited **12 students** to a 16-week technology workshop, so they can learn important skills.

KENYA

HUNGER

Drought is devastating countries in East Africa, Kenya among them. We have provided **280 families** in Garissa, Tana County River, with nutritious food parcels containing essentials that will last them a month.

SUDAN

HUNGER

Access to food in Sudan has become increasingly difficult, so we distributed goat meat to **100 families** in the town of Gourat, in the Alkurmuk region in the Blue Nile state.

A celebration of the successful completion of the peace building programme.

EDUCATION

We're working with vulnerable communities in the Alkurmuk region in the Blue Nile governorate, delivering training for community management and peace building.

SOMALIA

HUNGER

After an examination by our nutrition officer in the Kahda displacement camps, we determined that many newly arrived infants were severely malnourished, and provided a week's worth of feeding therapy supplements to bolster their health.

Children affected by the drought in Somalia receiving food supplements from Human Appeal.

Fatima back to full health and reunited with her family.

YOU HELPED FEED FATIMA WHEN SHE WAS STARVING

Fatima was born in a displacement camp in the north of the Idlib Governorate, and in her nine months of life, already risked losing her life.

Due to the difficulties in accessing food in Syria, Fatima was badly malnourished. Her mother did not realise that she was malnourished, but knew that her condition was growing worse, and did all that she could to help.

When the Human Appeal nutrition team visited Fatima, they identified her as suffering from severe acute malnutrition, and that her life was at risk. The team immediately followed up on her condition, transferring her to Al Imaan Hospital to prevent her condition from getting worse. Fatima received nutritional supplements and infant formula, and was routinely checked by the team to ensure her condition was improving.

After three months of treatment, Fatima had begun to make a full recovery, and has now returned to living with her family. Her return has also returned happiness to her family, seeing her recovered from malnutrition and out of the danger zone.

Al Imaan Hospital is funded by Human Appeal, and we are funded by your generous donations. Thank you for doing your part and helping young Fatima.

AFGHANISTAN

EMERGENCY AID

In the wake of the destructive earthquake in Afghanistan on the 22nd of June, Human Appeal Pakistan responded immediately to assist the village of Aslasha, which was badly affected by the earthquake, leaving over **50 people** dead. We provided cooked meals daily to over **200 people** to help compensate for the difficulties in accessing food, and we're still on the ground assisting families as they rebuild.

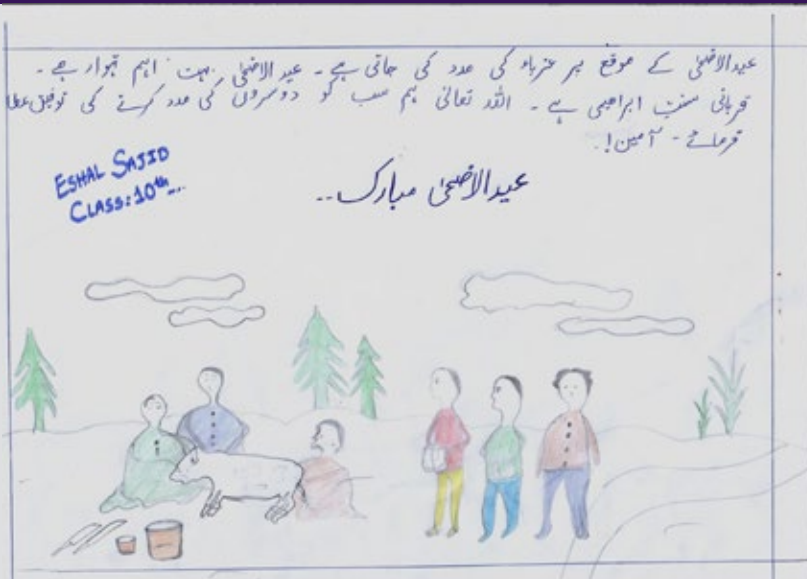

In the wake of the Afghanistan earthquake, a Human Appeal team distributes hot meals.

PAKISTAN

QURBANI

Our team visited the children by our orphan sponsorship programme in Azad Jammu and Kashmir, and found them learning about the story of Qurbani and Eid Al-Adha.

A picture about Qurbani drawn by Eshal, sponsored by our orphan sponsorship programme.

HELPING CHILDREN WITH NO EASY PATH

Your mercy is helping Sawera and Muskan reach for a brighter future.

Sawera and Muskan attend the Aminah Centre set up by Human Appeal in Pakistan. The Aminah Centre is a street centre for disadvantaged children, as well as a place for food and education.

Raised by their aunt and uncle, as their father is unfit to take care of them, Sawera and Muskan are young girls. Their family makes a living by selling small items like tissue paper, masks and pens, and so would struggle to afford an education for the two children.

The Aminah Centre, however, provides both education and food to the two girls, free of charge. They learn to read and write, as well as basic numeracy – skills that will be important in breaking out of the cycle of poverty.

Though one of their older brothers has recently died, Sawera and Muskan can look towards the future with confidence. Education will lead to brighter prospects and a brighter future, empowering the children of the future.

It's because of your mercy that we can run projects like the Aminah Centre, which serve to assist those at a disadvantage in life.

Thank you for your donations.

SYRIA

HEALTH

Working alongside the World Health Organisation (WHO), we distributed hand sanitisers to hospitals, health centres and other facilities across Syria to prevent the spread of COVID-19 and other diseases.

Handing out hand sanitisers to help restrict the spread of disease.

Alaa Qartal, recovering from her surgery.

HEALTH

Your donations helped Alaa Qartal, a young Syrian girl who desperately needed intestinal surgery that costed approximately **1,100 USD (£930)**. Human Appeal's generous supporters helped pay for the surgery so she would be able to live a healthy and happy life.

HEALTH

In partnership with Globus Relief, Human Appeal delivered medical supplies to hospitals in Syria so that they remain able to offer healthcare to displaced Syrians living in nearby camps.

In Syria, medical supplies are scarce. Delivering them is a vital service we collaborated with Globus Relief to provide.

Our team in Syria checking in on the animals to be sacrificed during Eid - Al - Adha.

QURBANI

Our team visited a local farm to ensure the sheep were being taken care of, and a veterinarian ensured they were in good health and fit for sacrifice.

**WHEN SUBHI
WAS STRUGGLING,
YOU HELPED
SUPPORT HIM**

Fatima back to full health and reunited with her family.

Our nutrition team encountered Subhi during one of their periodic visits to displacement camps in northwestern Syria.

Only 9 months old, Subhi is cared for by his grandmother. His mother died shortly after his birth, whilst his father is away, trying to find work so he can support Subhi and the rest of his family.

When our field team in Syria visited him in March, Subhi was in a terrible state, despite the best efforts of his family. He had already had a lung removed earlier in his life to deal with an illness, but he was in a state of severe acute malnutrition and was undergoing cerebral atrophy.

He was immediately referred to Al Imaan Hospital for treatment, and given therapeutic milk and nutritional supplements to improve his health. After a few weeks, his health was markedly improved, and Human Appeal would continue to support him until he was fully recovered.

Subhi was returned to his grandmother as healthy as he could be. Al Imaan Hospital is funded by you, our generous donors, who help us help people in the most difficult situations.

Thank you for your mercy.

YEMEN

Rahma recovering from one of the operations on her heart.

HEALTH

Only 3 years old, Rahma had a serious heart condition that threatened her health. We got her the medical treatment she urgently needed thanks to your donations during Ramadan, and her first operation was performed on the 21st of June.

HEALTH

Um Mohammed, a grandmother, successfully had a tumour removed from her neck and is now on the road to a full recovery thanks to your generous support during Ramadan.

Um Mohammed, happily recovering from her operation.

HEALTH

We helped 10 year old Doa'a by arranging for her to have much needed open heart surgery. She had tetralogy of fallot, a rare heart condition that impacted her quality of life, but her life has been changed thanks to your generous donations during Ramadan.

Doa'a in good spirits post her lifesaving operation.

YEMEN

QURBANI

Our team visited a farm in Audhias to ensure that the animals were healthy and in good shape in preparation for Qurbani.

It is very important that the animals sacrificed for Qurbani are of appropriate quality.

IRAQ

QURBANI

As our Human Appeal team prepared for Qurbani distributions for the most vulnerable people in Nainawa, they visited a local farm to make sure the animals picked for Qurbani meet the Sharia guidelines, and organised a training session to ensure your Qurbani is sacrificed to the best standards.

To ensure Qurbani is of the best quality, we ran a training session for staff.

THANK YOU

That's all for June. We hope you've enjoyed this quick insight into our work. Please share with your friends and family, and keep your eyes peeled for our next issue which will highlight how our projects progressed in July thanks to your support.
